Dr. Price's Cream Baking Powder

MRS. CARRIE CHAPMAN CATT AT LEFT, REV. ANNA H. SHAW AT RIGHT—SUFFRAGETTES IN WORLD CONGRESS.

London, Eng., May 1.—The militant suffragettes of London are this week the hostesses of those interested in woman's rights from the entire world. Delegates from thirty nations and hot Australia mingle with the Gaiety Japanese and other delegates from nearly every civilized land.

The American delegates at the International Woman's Suffrage congress are headed by the president of the congress, Mrs. Carrie Chapman Catt. There are two ministers of the gospel among the delegates, the Rev. Anna H. Shaw and Rev. Mar. Safford. Another delegate is Mrs. O. H. P. Belmont, who is the mother of a duchess. Mrs. William M. Irwin is the wife of a man noted in municipal deputations in New York city and each of the others has also a title to some degree of distinction apart from her share in suffrage agitation. They include Mrs. L. A. Conley Ward of Illinois, Mrs. M. L. Reine Baker of Washington, and the alternates who are attending the convention, but have no vote.

Mrs. Carrie Chapman Catt, as the president of the congress, has received considerable attention from the press of London, and the exploits of the militant suffragettes do not appear to impress her very much. She has been watching them in London since February. She said in an interview in the Welbeck Palace hotel that the International Woman's Suffrage alliance, being non-partisan, she could not express her opinion of the methods of agitation used here.

"This," said Mrs. Catt, "might be called the first official congress we shall have had since the organization of the alliance was completed five years ago in Berlin, and now, for the first time, we have the right to amend the constitution. One matter of great importance to be settled is the formation of a code of international parliamentary rules. None such now exists, strange to say for the use of any of the various kinds of societies which hold international conferences.

"The question, however, about which there is most feeling and difference of opinion is whether more than one society in each country shall hereafter

be allowed to send delegates to the congress. The fact that this question is urgently present is significant of the rapid growth of the movement. When the alliance was organized no country had more than one woman suffrage society. Certain countries now have a great many. One strongly Catholic country, which I will not name, has one suffrage association in that city, and a second with only Eucharist membership. One will oppose direct representation in the congress being given to the other.

"In Austria-Hungary antagonism among the races also furnishes a problem as to the extension of representation. In two more countries an active propaganda is progressing; these are Austria and Iceland. The only countries where there is a diminution of membership are Australia and Norway, which is accounted for by the fact that in both full suffrage has been achieved; in all others the membership is vastly increased. England will I think, grant full suffrage to women before America, largely because a change in the constitution of the latter is so difficult and tedious.

"Men of all countries will gain when this inevitable political reform comes. They now have too much responsibility. They will find relief when women begin to share it."

Going to Sleep.

What is this thing that knits up the raveled sieve of care? Cabals, in his investigations on the mind, endeavored to fix the order in which the different parts of our organization go to sleep; namely—first, the legs and arms, then the muscles that support the head and back. The first sense that slumbers is that of sight, followed in regular succession by the senses of taste, smell, hearing and feeling. The viscera (contents of the body cavity), he says, fall asleep one after the other, but with different degrees of soundness.—New York Press.

WAS SENT TO SALT LAKE HOSPITAL

Prof. Brown Seriously Injured in Pullman Sleeper at Grand Junction

Grand Junction, May 3.—A. R. Brown, professor of mineralogy in the Colorado School of Mines, was perhaps fatally injured today when three empty Pullmans being switched about the local yards, crashed into the forward end of the special train, carrying 135 members of the senior class of the school of mines on a trip of inspection to the mines of Utah and Montana.

The special consisted of two tour-ists and one Pullman sleeper and was standing at the depot without an engine. Prof. Brown was the only occupant of the forward tourist sleeper when the accident occurred.

The party left immediately on another train, running under special orders to get the injured professor to a Salt Lake City hospital.

MINING NEWS

IRON KING DRIFT STRIKES BIG CAVE
Knights Putting in Pipe Line—Drive Drain Tunnel at Baltimore.

Eureka, May 2.—A few days ago a small cave, or rather an open fissure was broken into on the property of the Iron King, out in the eastern part of the district, and as the cave is lined with manganese and quartz the indications are considered very favorable for the future. The management of the Iron King intends to do some sinking in this cave within the next few days. The big tunnel being run into the mountain side at this property is in a distance of 1,000 feet, and 2,000 feet more work will be necessary to put the tunnel beneath the big iron blow-out. There remains to be done about 5,000 feet more work in the tunnel to connect it up with the shaft of the Iron King, but it is the opinion that ore will be discovered at a point below the iron croppings. The tunnel through the shaft includes a drift which is being run in a westerly direction from the 600 level, and also another drift from the 400 level in the same direction. Both of these drifts are in about 500 feet, and it was in the former that the cave was broken into.

Work of sinking in the shaft at the East Tintic Development company was resumed Wednesday, and it will be but a few weeks before the company will commence the shipment of ore again.

The Eureka Leasing company, which has an option on the control of the Provo Mining company's ground, is now carrying on the work of retubing the shaft. The lease on the ground carries an option on 200,000 shares of treasury stock.

Work was started the latter part of the week on the pipe line which is to convey water from Silver City to some of the Knight properties, including the Apex, Black Jack, Dragon, Iron Blossom and Colorado. Water from the Swansea mine, as well as a large flow from the Gemini mine on this side, which is being purchased by the Knight interests, will be discharged into a large storage reservoir which is being built near Silver City. A pumping plant will be installed to force this water from the reservoir to the different mines mentioned above. The smelter will also use a proportion of the water, but it will run to the smelter without pumping.

The Montana Mining company has decided upon the location for a three-compartment shaft that will be sunk as soon as the machinery is installed.

A drain tunnel will be driven at the Baltimore property in order to drain the shaft of the water that interfered with the work of sinking, at a depth of about 300 feet. When the tunnel work will be carried on from the tunnel level, thus saving about 300 feet of hoisting.

Chief Consolidated.

A couple of important mining transactions were made here the past week, the first of which was the taking up of the option on the Granite claim by the Chief Consolidated company, and paying therefor \$30,000. The Chief Consolidated company also purchased an undivided one-half interest in the American Star and Blackbird claims, in the same locality, the amount paid over in this instance being \$20,000. The other half of the American Star and Blackbird claims, and the Triangle claim, have just been

sold by Mrs. Mary D. Sullivan of this city to the Tintic Mines company. The new ground, which the Chief Consolidated company has taken over, together with the holdings of the Little Chief, gives the company one of the most valuable groups of territory in the district.

PLACER GROUND ON SALMON RIVER BONDED

J. H. Shearer of Buffalo, N. Y., and his associates here bonded the Redfern placer ground, 270 acres, along the Salmon river in central Idaho, from G. H. Vessey, for 60 days for \$35,000. Mr. Shearer, who is in Spokane, says it is a likely extensive development work will follow. The property is known to be rich, but like the Moscow Bar, at the headwaters of the North Fork of the Clearwater, it is placed high, and getting water to the gravel will be expensive. A long ditch and a gasoline pump will be installed the coming summer, and a run will be made until snow flies.

BIG ASSAYS FROM ORE IN SNOWSTORM PROPERTY

Walter B. Pitcock and James Covey, one time owners of the Buster mine near Elk City, Idaho, have come out of the district with specimens of ore from the Snowstorm property which rank with any yet seen. The property is owned by the Pitcock brothers and Covey. They have one tunnel in 210 feet on the 105-foot level, running in on ore. The ore shoot extends to the surface. They also have struck the lead in a tunnel on the 175-foot level, one of their latest assays running \$1,062.63 the ton, not including the specimen ore. Six ounces of pulp panned out more than \$6 in gold. There is from four to eight inches of this running through the center of a ledge from three to five feet wide that is also rich. They are planning further development work and believe it will prove richer with depth.

RAILROAD TO RICH MINES IN COEUR D'ALENES

Three million dollars is involved in a deal which Daniel C. Corbin, president of the Spokane International Railroad company is credited with negotiating for the control of the Wagner group at the head of Hall creek, a tributary of the Duncan river in southeastern British Columbia. Private advices from Kaslo, B. C., are that experts have reported favorably on the property, which is owned chiefly by George W. Odell, W. J. Thayer, D. W. Henley and C. P. Porter of Spokane. The deposits of silver-lead are large and the values of the ore are rated high; in fact, the group is declared to be the largest and richest in the province. Mr. Corbin is not a practical mining man, though he has been identified with the development of the camps tributary to Spokane since territorial days, having built the first railroad into the Coeur d'Alene valley, and also a line from Spokane to the boundary country, north of here, now operated as the Spokane Falls & Northern branch of the Great Northern. He also built the Spokane International line from British Columbia to Spokane, now used by the Canadian Pacific system. He owns several coal fields in British Columbia and Alberta and his entrance into the mineral camps will undoubtedly add much wealth to this district.

Wanted the Painkiller.

Whenever two-year-old Ruland bumped his inquisitive head or bruised his adventurous body a bottle of some good old-fashioned lemon juice was brought out and some of its soothing contents applied to the injured part. Recently Ruland received his first spanking, an experience which was to him totally new, strange and mystifying. About all he understood of it was that it hurt and immediately after being allowed to wriggle off of the maternal knee he toddled toward the shelf on which stood the old friend, the bottle, and with hands upraised cried imploringly:

"Botty, botty, give Willand botty sweet"—Kansas City Times.

Sure Way of Identification.

The finger print method of identification has been extended to commercial uses by the Postal Savings bank of Manila. This bank has recently issued a series of stamp deposit cards, on which are spaces for stamps of different values to be affixed. When the depositor has paid the value of one peso on the card it is exchanged at the bank for a deposit book, showing the amount to his credit. Opposite the lines for the owner's signature and address is a square ruled off for the reception of his thumb print, so that, even if illiterate, depositors may readily be identified.

When Cold Breathe Deeply.

A simple way to get warm after exposure to cold is to take a long breath with the mouth firmly shut. Repeat this several times, until you begin to feel the heat returning. It requires a very short time to do this. The blood in the lungs is quickened and thus causes the blood to circulate faster. The blood flows into all parts of the veins and arteries and gives out a great deal of heat. It is stated that this method of deep breathing prevents colds and a great many other ailments if begun in time.—Family Doctor.

Pumps Better Than Dams.

A Mahanoras newspaper calls attention to a test of the pumping of water in the Rio Grande region for irrigation compared to the older method of constructing dams. A 36-inch pump with 36,000 gallons capacity on a 24-foot lift, was operated at a fuel cost of 62½ cents an hour. Whatever irrigation is being done through the Mexican side system, and there is every prospect that more and more of it will be attempted by the owners of land along the river.

Un Faux Pas!

A young gentleman living at X— was invited by his rich aunt to visit her in London. While walking with her along Victoria street he saw her bow to a gentleman in clerical attire. "Who was that, aunt?" he inquired. "That," exclaimed the lady, "is the vicar of X—." "Strange!" remarked the nephew, thoughtlessly. "I believe this is the first time I have seen him." "He has been vicar ten years!" was the reply.

BOTTLE WITH NOTE FOUND IN RIVER

Sheriff's Posse to Immediately Attempt to Find Sender of Message

Reno, Nev., May 3.—A bottle containing the following note, was fished out of the Truckee river by Edson McLeod, a fisherman, three miles west of Loughlin Springs, at 3:30 today: "Two men took me off the train at Verdi, and have had me down the river about three days. I am about crazy. Help me if you find this. (Signed)

"AGNES HAMILTON." There was no time nor date on the note. The police department turned the note over to the sheriff's office and it was left in the morning and it will be made to trace the sender. Verdi is twelve miles west of Reno and the place where the note was found is about nine miles. It is figured that the bottle containing the note must have been dropped into the river at some time today, as the river runs rapidly.

REVERSED DECISION OF COURT

United States Circuit Court of Appeals Held Trial Court Was in Error

San Francisco, May 3.—Holding that the trial court was in error in having stricken from the record certain testimony tending to show the intent of the railroad company in accepting a lower rate than that fixed by its freight tariff on file with the interstate commerce commission, the United States circuit court of appeals today reversed the decision of the district court at Los Angeles in the case of the United States against the Santa Fe Railroad company, wherein the company was found guilty on sixty-six counts of refusing on shipments of time between Nelson, Ariz., and Los Angeles, Cal., and fined \$350,000. The case was remanded for a new trial.

The appeal was heard by Judges Gilbert, Ross and Morrow. Following an analysis of the argument of the appellant as to the sufficiency of the indictment under which trial was had, the opinion handed down today expresses the decision of the appellate court in reversing the verdict, properly rejected the demurrer, although a slight divergence from the wording of the statutes is noted.

The testimony of F. P. Gragson, freight agent of the Santa Fe, who was called by the prosecution, but whose evidence was stricken out on motion of the prosecution, is recounted. Gragson testified that he had been satisfied by the shippers that the full forty thousand pounds, constituting a carload lot under the company's tariff had been placed in the cars; but that the railroad scales at the point of delivery had shown a considerable loss in transit in each of the sixty-six freight cars. On the indictment. On this showing, he said, the company had agreed to accept payment from the shipper, the Grand Canyon Line and Cement company of Arizona, for the amount actually delivered, constituting a carload lot of \$2,500 per 100 pounds.

The evidence was stricken out of the record and in his instructions, Trial Judge Wellborn withdrew it from the attention of the jurors.

The appellate court held that inasmuch as the freight tariff provides that a shipper shall pay for all over 40,000 pounds contained in a car, and that since the full amount necessary to obtain a carload rate is shipped in each instance the trial court erred in not allowing this testimony to go before the jury.

Los Angeles, May 3.—The Santa Fe Railroad company was indicted on November 7, 1907, for violating the Elkins law, by Judge Olin Wellborn, of the United States district court. The railroad company was indicted for giving rebates to the Grange, the Arizona Lime and Cement company of Arizona, on shipment of lime from Nelson, Ariz., to this city. The alleged rebates occurred between May, 1905, and July, 1906, and ranged in amounts from 35 cents to \$14.05. The total of the alleged rebates was less than \$500. The jury in Judge Wellborn's court found the company guilty on sixty-six counts, upon which a fine might have been imposed of from \$1,000 to \$20,000 on each count. The company appealed.

District Attorney Lawlor, now assistant attorney general in the interior department at Washington, fought the case for the government. Thomas J. Norton, now of the Santa Fe's Chicago offices, defended the company.

LECTURES ON RELIGIOUS HISTORY BEGAN AT COLLEGE

Paris, May 3.—The Abbe Loisey inaugurated his lectures on religious

THIS WILL INTEREST MOTHERS.

Mother Gray's Sweet Powders for Children, a Certain Relief for Feverishness, Headache, Bad Stomach, Teething Disorders, move and regulate the bowels and destroy Worms. They break up Colic in 24 hours. They are so pleasant to the taste and harmless as milk. Children like them. Over 10,000 testimonials of cures. They never fail. Sold by druggists, 25c. Ask today. history at the College of France today, and was given an ovation by the Republican students. This demonstration followed a counter-manifestation by the Catholic and Royalist students.

When the abbe began the Catholics and Royalists threatened to repeat the tactics they employed recently against Prof. Thalassas, but the Republican students, who had organized to protect the abbe, and the police, prevented them from carrying out their intentions.

WAY OUT OF THE DIFFICULTY.

Problem That Seemed Knotty Solved by Canny Scotsman.

"I canna' leave ye thus, Nancy," a good old Scotchman wailed. "Ye're too auid to work, an' ye couldna' live in the almshouse. Gin I die, ye maun marry anither man, wha'll keep ye in comfort in yer auld age."

"Nay, nay, Andy," answered the good spouse. "I could na' wed anither man for what wad I do wi' two husbands in heaven?" Andy pondered long over this; but suddenly his face brightened.

"I hae it, Nancy!" he cried. "Ye ken auid John Clemmens? He's a kind man, but he is na' a member o' the kirk. He likes ye, Nancy, an' gin ye'll marry him, 'twill be all the same in heaven—John's na' Christian!"—Success Magazine.

Did Much for South America.

Theodore Vail, who has been called from South America to the presidency of the American Telephone and Telegraph company, the largest telephone company in the world, helped to organize and was the president of the first company. He calls it his baby. He retired because of ill health and turned his attention to South America, in the development of which he has great faith. He introduced the American electric system of street railways in Buenos Aires, which has the best in that part of the country. He also installed the telephone system in the largest cities of the republic.

Canal That Russia Needs.

Russia's ministry of ways and communications has appointed a board of engineers to make preliminary surveys for the long-projected canal to connect the Baltic with the Black sea. The canal, in the making of which several rivers will be turned to account, will have its northern end at Riga on the Gulf of Riga, 309 miles southwest of St. Petersburg, while the southern end will be Kherson, on the right bank of the Dnieper, and 92 miles east-northeast of Odessa. When this project is completed Russia may move her own ships to and from the Black sea without asking permission.

Cultivating Good Temper.

"I wonder sometimes if good temper might not be taught. In business we use no harsh language, say no unkind things to one another. The shopkeeper, leaning across the counter, is all smiles and affability—he might put up his shutters were he otherwise. Hasty tempers are banished from the city. Can we not see that it is just this to our interest to banish them from Tooting and Hampstead?"—Jerome K. Jerome.

Disappearing Home Life.

The flat dweller ought not to keep a dog, prefers not to keep a cat, cannot have a garden, has no chance of keeping house, has no possible place for memories and, most emphatically, all has no use or accommodation for babies. Although it may be possible to make homes without kittens, or babies, or flowers, or memories, or cupboards, the spirit of home is hard to woo and win without any of them.—Fortnightly Review.

Valuable Potato.

In the bidding in of a monster potato auctioned off during the international fair, at San Antonio, Tex., Ollie Murphy, a soldier of Fort Sam Houston, paid what was probably the highest price ever paid for a single potato in Texas. The vegetable cost Murphy \$1.80. It was the principal item of a dinner served by Murphy to his comrades at the post on the following day.

In the Shop.

The lady had looked at about twenty trunks without finding one to her satisfaction. At last the salesman suggested that if she could give him an idea of what she had in mind he might be able to suit her.

"I want," said the lady, impressively, "a smaller trunk than this, but one that holds more."

Iron Rust.

Sprinkle on the spot of iron rust some powdered alum and arrange the spot exactly over the spout of a boiling water kettle. Wash the alum out of the cloth at once, else the alum would eat a hole in the fabric.

WANT ADS BRING BIG RESULTS

CONFERRED FIRST GOLD MEDAL

On Wilbur and Orville Wright at Institution of Civil Engineers

London, May 3.—There was a demonstration of remarkable enthusiasm at the institution of civil engineers to-night when the Aeronautical society of Great Britain conferred on Wilbur and Orville Wright, the Aeronautists of Dayton, Ohio, its first gold medal. The spectators cheered repeatedly while the Wright brothers blushing bore their honors through an hour of the warmest eulogies. Finally the entire assembly rose up and gave three cheers for each of the brothers. They sang, "For They Are Jolly Good Fellows," and ended by cheering Miss Katherine Wright.

Sir Hiram Maxim, Lieutenant General in the British army, and a large number of scientists and ladies, were present.

Speeches were made by Major Baden Powell, Col. J. E. Capper, the war office's aeronautical expert, who referred to the Wright brothers as "unspoiled, as though they were nobodies," and by the chairman of the gathering, Edward Purkis Frost, who presented the medal.

Wilbur and Orville Wright made brief speeches, expressing their thanks. A reception was then held, and the brothers were surrounded and besieged for autographs. Earlier in the evening they were given a dinner at the Ritz hotel by the Aeronautical society.

The war office is not likely to conclude arrangements with the inventors until their aeroplane has been given a trial in England in the presence of experts. Engagements in the United States and Germany, however, preclude the possibility of the Wrights being able to attend to this personally for six months, but they have arranged with a builder here for the construction of machines and have appointed an agent for Great Britain.

Their patents, therefore, will be protected, and they expect to sell privately, even if the government does not purchase.

TWICE-TOLD TESTIMONY.

Ogden People Are Doing All They Can For Fellow Sufferers.

Ogden testimony has been published to prove the merit of Doan's Kidney Pills to others in Ogden who suffer from bad backs and kidney pain. Let any sufferer doubt that the cures made by Doan's Kidney Pills are thorough and lasting, we produce confirmed proof—statements from Ogden people saying that the cures they told of years ago were permanent. Here's an Ogden case.

Thos. W. Wootton, 732 Barlow Lane, Ogden, Utah, says: "For a year or more my back was very lame and sore and pains through my joints were so severe that I was hardly able to regain an erect position after stooping. In the morning when I arose the pains would be so acute that I would hardly be able to move. At last I decided to try Doan's Kidney Pills and procured a box from Badcom's Pharmacy. They promptly eradicated the trouble." (From a statement given July 30, 1906.)

Cured to Stay Cured.

On the 21st of September, 1907, Mr. Wootton confirmed his former statement, saying: "The cure Doan's Kidney Pills affected has proved permanent and I heartily recommend them to anyone suffering from kidney complaint."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Candy Cure for Intemperance.

Scientists have long known that the taste for sweets and the appetite for alcohol almost never exist in the same person. It does not follow that a man who does not like candy is a temper, but he does like candy it is extremely improbable that he likes alcohol, too.—Confectioners' Union.

Kippeded Herrings.

These are dainties much prized in England. Remove the herrings from the can and place them on a platter, sprinkle with pepper and lemon juice, brush with butter, and cover with the liquor from the can. Heat thoroughly, and serve with a garnish of parsley and lemon.
